Frasca Helicopter Training Device

**Affordable, Accurate  
and Reliable Simulation  
for Helicopter Training.**

Get the features you need from the leader in simulation technology. With 60 years of simulation experience, Frasca won't let you down. Our NEW Helicopter Training Device (HTD) is built with aerodynamic technology used in our Level D simulators but at an affordable price. Designed for IIMC – inadvertent IMC encounters as well as operational and procedural training, the FRASCA HTD gives you training value with a no nonsense approach. You get the features you need to train your pilots in a reliable and affordable FRASCA device.

**Trust FRASCA for your Helicopter  
Training Device Requirements.**
